

RED PANDA
NETWORK

Save the
Last of the
First Panda.

Red pandas were the **first pandas discovered**, but they are now endangered due to habitat loss, poaching, and climate change. **Fewer than 10,000 red pandas remain in the wild today.**

Red Panda Network is leading the fight to save the red panda, protecting this endangered species and restoring their threatened habitat.

Join the movement to protect pandas, people, and the planet today.
